

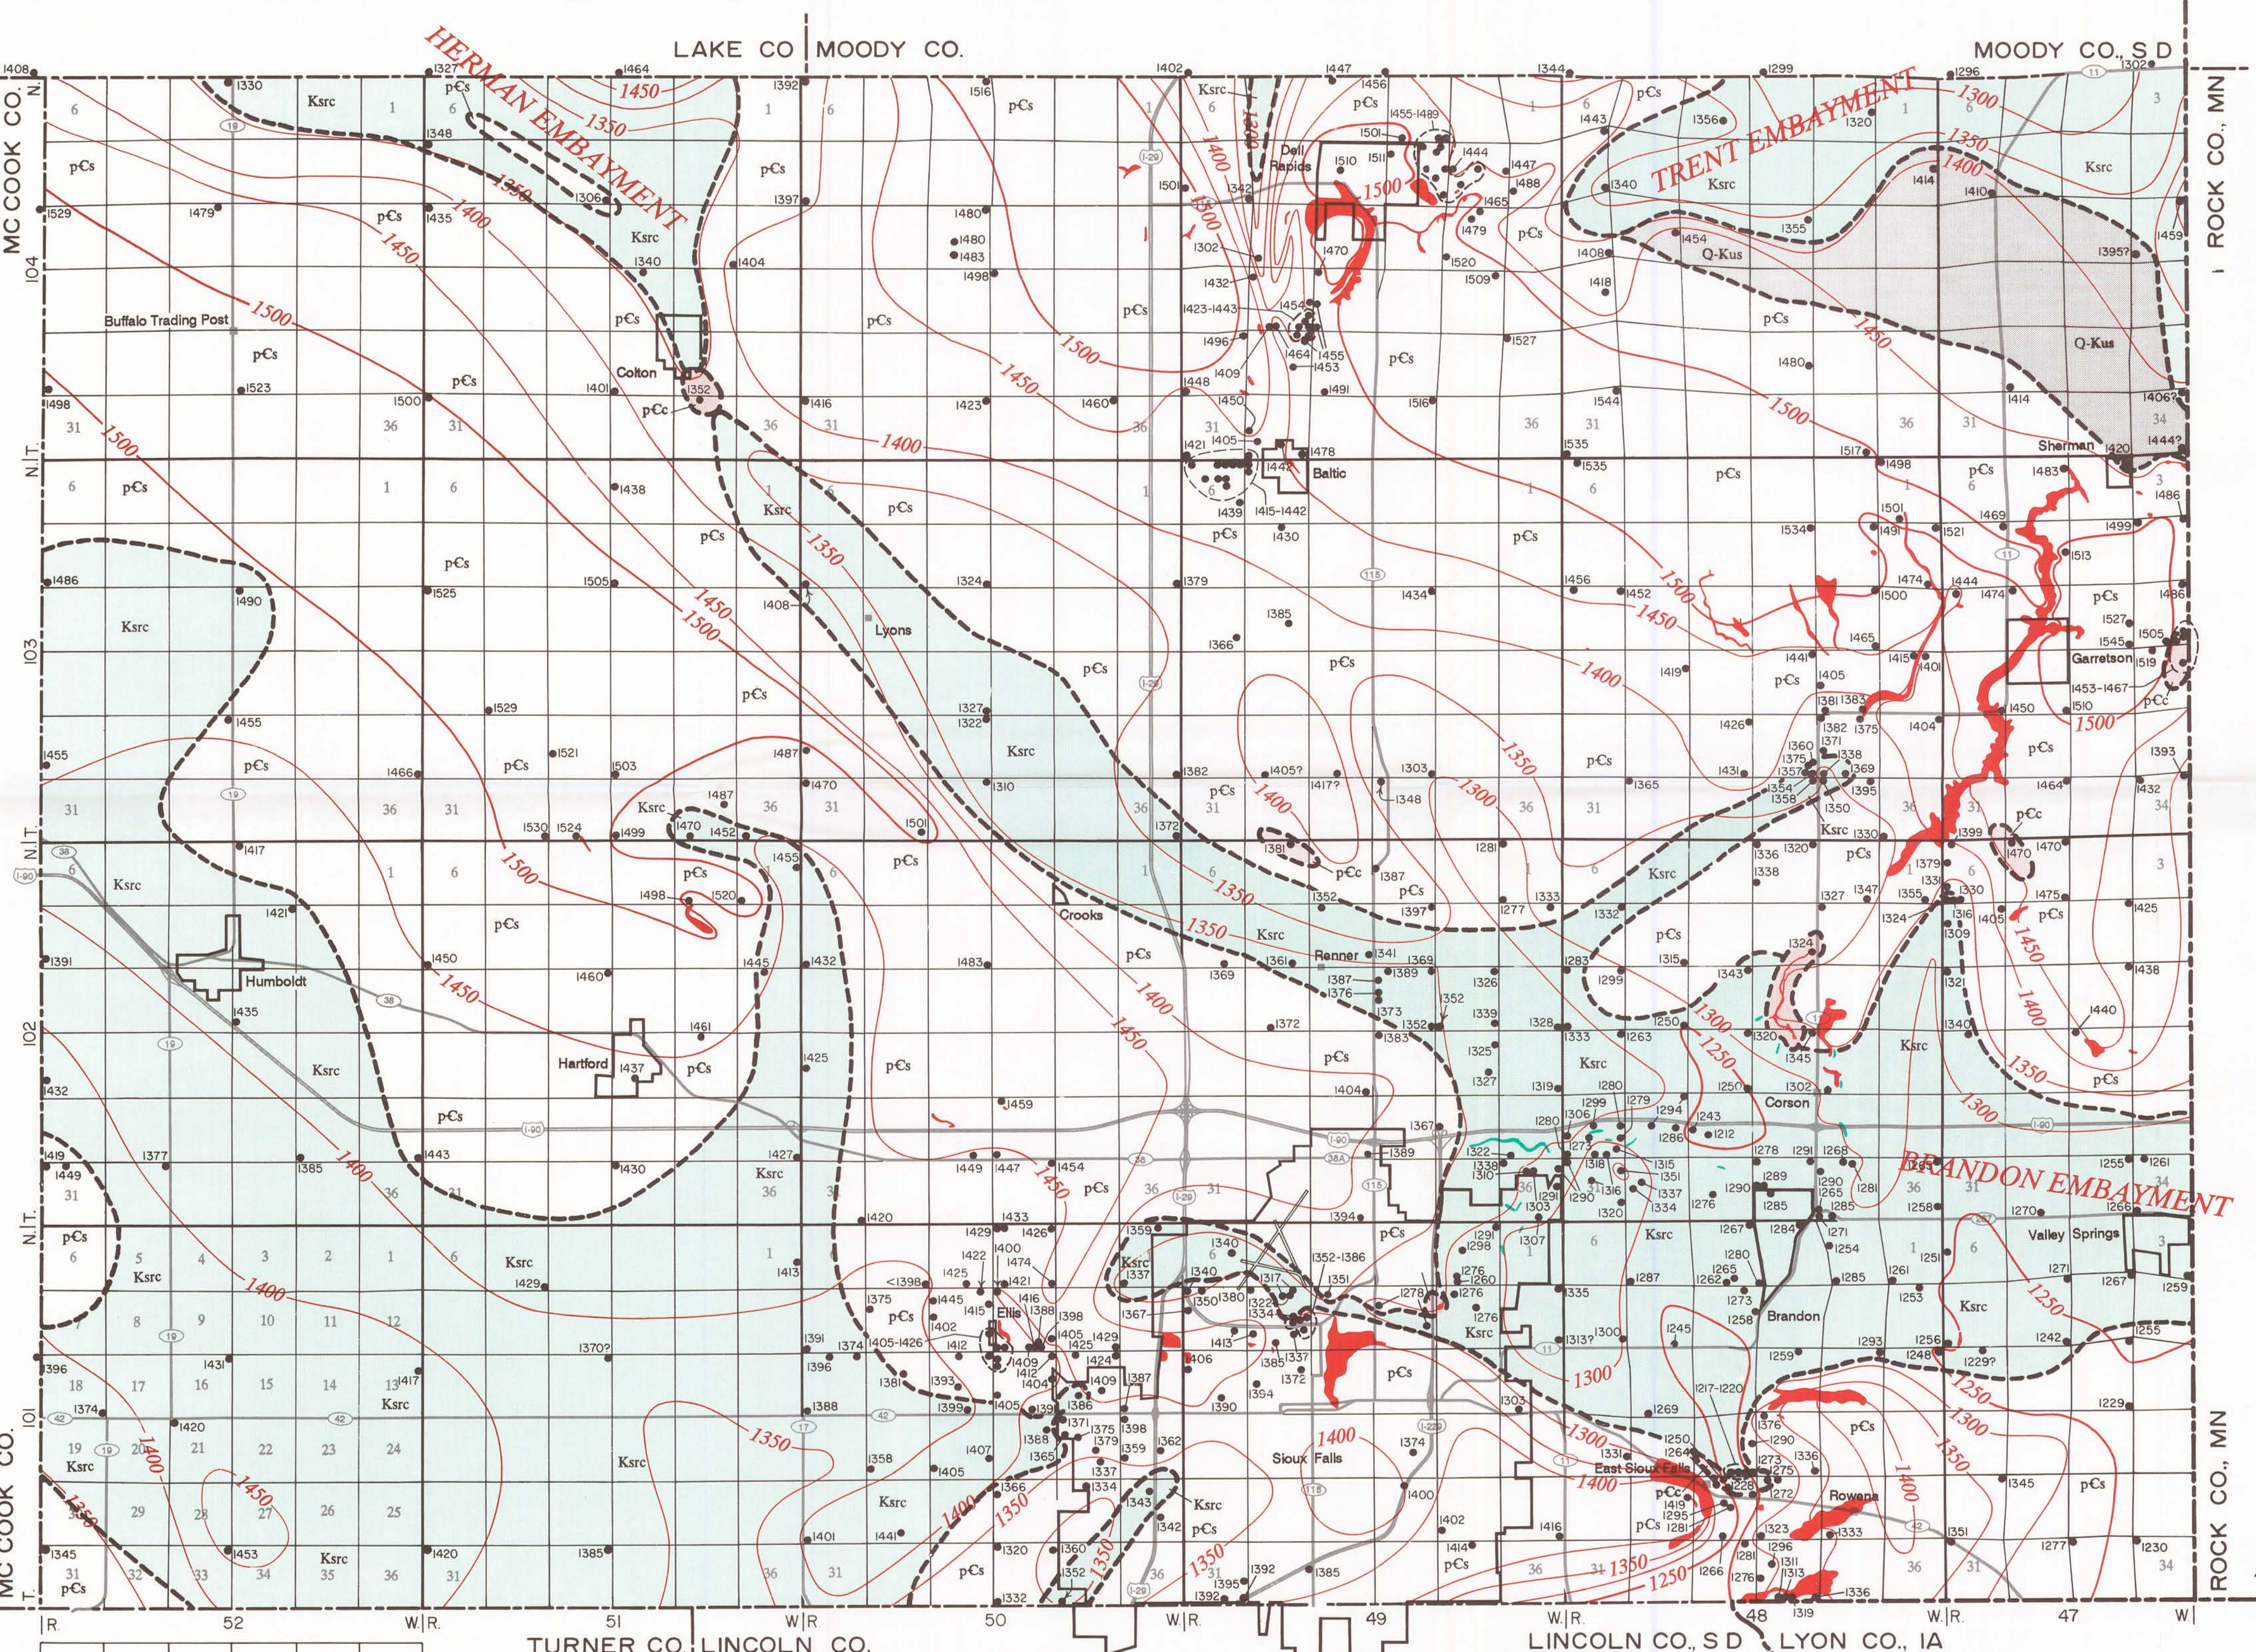

Plate 2. Bedrock Geologic Map of Minnehaha County, South Dakota.

CRETACEOUS	Q-Kus	UNDIFFERENTIATED SILTS
	Ksrc	SPLIT ROCK CREEK FORMATION
PRECAMBRIAN	pCc	CORSON DIABASE
	pCs	SIoux QUARTZITE

- Data point. Number is bedrock surface elevation, in feet above mean sea level. A "less than" symbol (<) indicates elevation is less than the number shown. A question mark (?) indicates elevation is uncertain.
 - Contour line connecting points of equal bedrock elevation, in feet above mean sea level. Contour interval = 50 feet.
 - Area where too many data points exist to include all data numbers. Numbers given are lowest and highest surface elevation, in feet above mean sea level.
 - Approximate boundary of geologic formations.
- For township section numbering system, see T. 101 N., R. 52 W.

Scale 1:100,000
