Executive order commissioning the GeoSpatial Advisory Group

The GeoSpatial Advisory Group (GSAG) will be a multi-entity group designed to break down the barriers between state agencies, local government, federal government and citizens

What will the GSAG do?

Include local and federal government in decision making

Foster communication and sharing

Create Standards

Leverage resources

Create, update and distribute GIS data

Mission Statement

We recognize the value of geographic information and the advantages of using it for the benefit of South Dakota's economic and social development, health, justice, transport, education, environment and culture.

We will therefore co-operate to make geographic information work for the people of South Dakota By:

- providing strategic vision and leadership;*
- ensuring access to the most up to date and accurate geographic information about South Dakota;*
- removing the barriers to efficient and effective use of geographic information;*
- communicating the potential of geographic information and ensuring that our work is fully linked with City, County and Federal activities;*
- promoting appropriate technical and professional standards for use of geographic information.*

All are invited to participate the GSAG

*Our next meeting is August 11, 2005, 1:30 pm – 3:00 pm
DOT Commission Room, located near the main lobby in the Becker-
Hansen building, Pierre*
