

Explanation of Field Names for Oil and Gas Production Information

API_Number: The number assigned to a well using the American Petroleum Institute numbering scheme.

Facility_ID: Facility identification tag.

County: The name of the county where the well is located.

Well_Name: The name of the well as determined by the Minerals and Mining Program, South Dakota Department of Environment and Natural Resources.

Qsec_location: The surface location of the well given on the Application for Permit to Drill. The location format is a variant of the U.S. Public Land Survey System and shows, from left to right, the quarter sections from smallest to largest, followed by section number, township, and range. When the letter "C" is given in the quarter section it indicates the "Center" of the following quarter section.

Reported_Well_Status: Status of the well as reported on monthly production reports.

Date_Production: The month and year in which production occurred.

Prod_Days: The number of days that a well was producing during the monthly reporting period.

Oil_(bbls): The amount of oil that was produced, in barrels, during the monthly reporting period.

Total_Gas (mcf): The total amount of gas, in thousands of cubic feet, that was produced during the monthly reporting period.

Marketed_Gas (mcf): Total amount of saleable gas, in thousands of cubic feet, produced during the monthly reporting period.

Water (bbls): The amount of water, in barrels, that was produced during the monthly reporting period.

Total_oil_on_Hand_End_Month: Total amount of oil, in barrels, that are on hand at the end of the monthly reporting period.

Prod_Comments: Comments related to production for a specific well.

Reported_Operator_Name: Current operator of the well.

Field_Name: The name of the oil or gas field from which production is occurring.

Enhanced_Recovery_Unit: The name of the Enhanced Recovery Unit from which production is occurring.
