Figure 1. Isogradient map of South Dakota.

LEGEND

- Areas indicating geothermal gradients of less than 3°F per 100 feet of depth.
- Areas indicating geothermal gradients ranging from 3°F to 5°F per 100 feet of depth.
- Areas indicating geothermal gradients in excess of 5°F per 100 feet of depth.

Numbers adjacent to data points indicate geothermal gradient in °F per 100 feet of depth. Isogradient intervals at 2°, 3°, 4°, 5°, 6°, and 7° per 100 feet of depth.

For county names see back of this map.
